## INTRODUCTION

**G**REAT CARE has been devoted to the preparation of this catalog in order that it may reflect present architectural trends and be a means of standardizing the rather complex millwork business in the territory where it is in use, to the benefit of dealer, architect, contractor, and builder, alike.

Those responsible for its creation undertake the servicing of retail dealers throughout the states of Oregon, Washington, Idaho and Montana and are particularly desirous of being helpful to such dealers and their customers. With that objective, the catalog offers a wide choice of types and designs and effort has been made to make all stipulations clear and understandable.

The prices shown herein are list prices and subject to discount.

## DIRECTIONS FOR ORDERING

Always order by design number. Time, expense and misunderstanding can be saved by noting the following suggestions:

We will understand all orders and inquiries as calling for style and sizes as described in Stock Millwork Catalog No. 39, unless covered by instructions to the contrary.

Be explicit in ordering. Do not assume that we can otherwise visualize what you have in mind.

### WINDOWS AND SASH

The term **Sash** indicates one piece to fill opening.

The term **Window** indicates two pieces consisting of upper and lower sash.

Orders for windows should state number and arrangement of lights, inside measure or glass size of each sash, thickness, and whether check rail or plain rail. However, use of design numbers will simplify this and prevent much confusion.

Where odd windows or sash are ordered, give both glass measure (G.M.) and outside measure (O.S.M.) and if of intricate design, furnish sketch.

**Note**—All windows and sash are understood to be glazed unless specifically ordered unglazed. If double strength (D.S.) glass is wanted, same should be clearly indicated.

### DOORS

State width, height and thickness, number of panels and arrangement of same.

The sticking of the various doors shown in this catalog is standard in the Northwest, and we will understand all orders to be for same, unless otherwise specified.

If odd, send sketch or detail.

Odd doors will be made with regular stock widths of stiles, rails, muntins and panels unless specifically ordered otherwise.

### FRAMES

Frames listed are for standard wall construction with  $3\frac{5}{8}$ " studs,  $\frac{3}{4}$ " sheathing, and  $\frac{3}{4}$ " lath and plaster. Any deviation should be fully explained in order that the frames furnished may fit exact requirements.

### SASH WEIGHTS

We carry a stock of sash weights, pulleys and cord. Customers ordering same from us will be assured of receiving weights to properly balance sash, as where we furnish weights we ascertain weight of each sash and supply weights of the correct size for same.

RIBBON GRAIN PHILIPPINE MAHOGANY

### IMPORTANT CARE OF FRONT DOORS

Do not permit valuable doors to be delivered to your building until you are ready to use them and until the building is thoroughly dry. Immediately upon arrival of doors they should be properly finished and top and bottom edges given a coat of oil and white lead to prevent absorption of moisture.

Size of Door	List Prices

## FLUSH

No. 820—Fir  
Rotary Cut.  
No. 821.  
Ribbon Grain  
Philippine Mahogany.

### COLONIAL INTERIOR DOOR

This door is designed to supply the demand for an inexpensive door suitable for Colonial type construction. Ovolo sticking and raised panels are selected as typically Colonial and vertical grain chosen for the panels to assure smooth surfaces for the paint or enamel appropriate with such construction.

### FLUSH INTERIOR DOOR

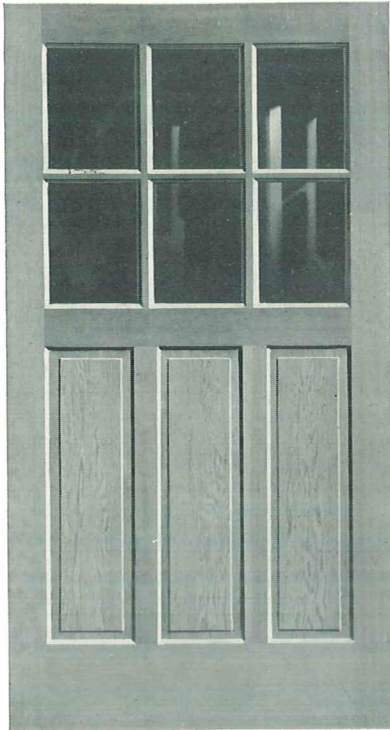

This door is designed to combine strength with lightness and is constructed with cross banded hollow core covered with smooth flush faces. Thus is provided a beautiful article appropriate for any modern type of architecture, which is offered in either rotary cut Fir or matched ribbon figured Philippine Mahogany with fir edges.

Screens of Any Size or Design for Sash or Windows Furnished on Order.

## ADJUSTABLE HARDWOOD SCREENS

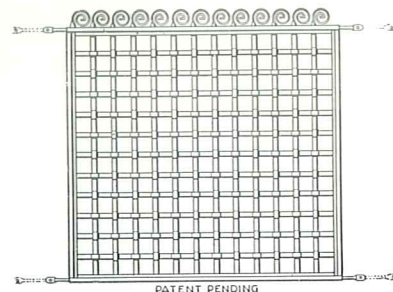

No. 847—(Closed)

### ADJUSTABLE HARDWOOD SCREENS

For full particulars regarding sizes and prices applying to adjustable hardwood screens see current screen door schedule which is customarily issued seasonally.

## ADJUST-O-GRILLE

No. 848

Adjust-O-Grille makes any Screen Door more attractive and protects the screen cloth at the point of most severe wear from bumps, knocks and kicks.

Over-all height, 25".

Width, adjustable:  
From 27" to 36".

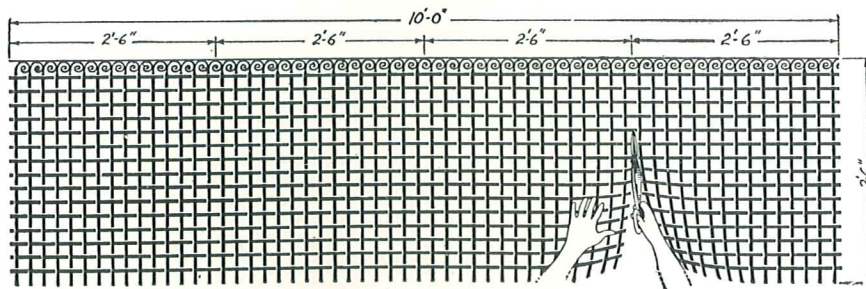

Duplex Brass Finish.

No. 848—List Price, Each.....\$7.10

## GRILLES IN SHEETS

No. 849—List Price per 10-ft. Sheet.....\$31.50

Flat type with scroll at top. Flat bar at top saves filling in wood cross bar on door. Enough in this sheet for four ordinary Screen Doors. You cut the desired lengths to suit requirements. Two-inch mesh. Duplex Brass Finish.

Always Specify Items by Design Numbers

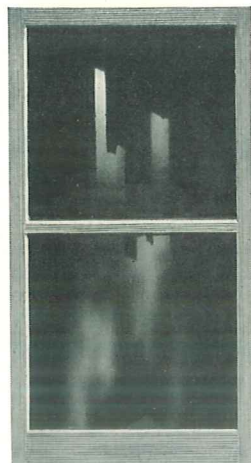

## TWO LIGHT STORM SASH

1 $\frac{1}{8}$ " Thick—Glazed Clear Sheet Glass

Stiles and Top Rails 2 " wide, face measure

Bottom Rail Not Over 4 $\frac{1}{4}$ " wide, face measure

Cross Bar 1 " wide, face measure

No. 850

Storm Sash are customarily made longer than windows of the same glass measurement, thus allowing for sill pitch.

When Storm Sash are to match off center windows (check rail higher than center) exact measurements must be furnished so that cross bar corresponds with check rail.

If ventilator in bottom rail is required, orders must so state and same will be furnished at extra charge.

For Storm Sash to match stock two light check rail windows listed in this catalog, the same list as applied to stock windows, 1 $\frac{1}{8}$ " thick, will be used, and discounts quoted therefore apply to lists shown on Page 26. Unless otherwise specified storm sash will be made to match No. 851 2 lt. double hung windows.

For other types and sizes, Prices on Application

STORM SASH FOR ANY SIZE WINDOW OR SASH WITH  
ANY CUT UP ARRANGEMENT FURNISHED ON ORDER

In case of Storm Sash for sash openings be sure to specify full outside measurement required to fit the space the Storm Sash is to occupy.

Storm Sash for Masonry Buildings are made additional length, according to frame construction. In this case accurate overall measurements must be specified.

When ordering windows and sash always specify width first and height last.

*Always Specify Items by Design Numbers*

# TWO LIGHT CHECK RAIL WINDOWS

1 3/8" Thick

No. 851—Glazed S.S.B.

No. 852—Glazed D.S.B.

Plowed and Bored for Weights and Cord.

Measurements shown for Rough Stud Wall Openings  
apply when weights and cord are used.

Note how  
window  
is made.  
This is  
what is  
termed

CHECK

RAIL

It helps  
to keep  
out cold  
and dust.

*Always Specify Items by Design Numbers*

## SEMI-STOCK WINDOWS AND SASH

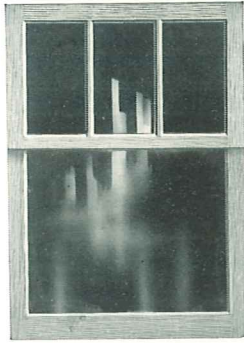

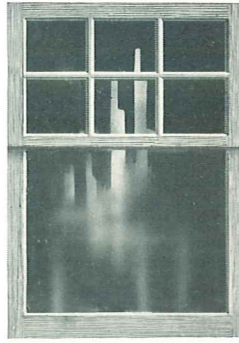

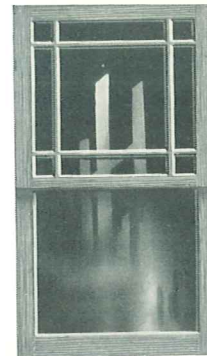

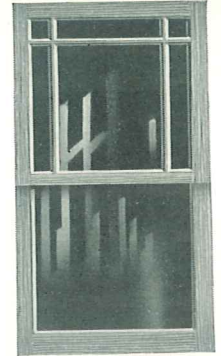

While this catalogue lists a wide choice of stock designs of windows and sash and builders find it advantageous to confine their selections to such purely stock items, there is a demand for non-listed items to fit individual tastes. Facilities for supplying such items are so well developed as to classify them as "semi-stock," which can be supplied after receipt of specifications with slight additional time and cost over that applicable to listed stock items. To facilitate serving the trade with such material the following illustrations are offered as examples. Prices on application for any non-listed design or size.

## OFF CENTER WINDOWS

Height of bottom sash greater than top sash thus bringing check rails above center.

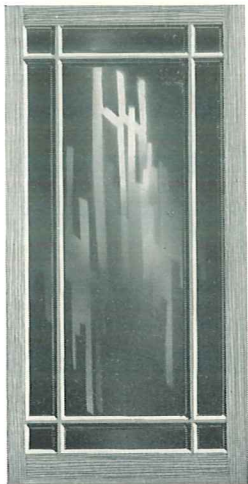

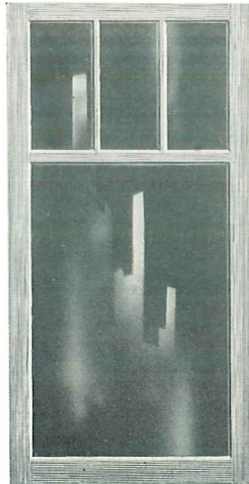

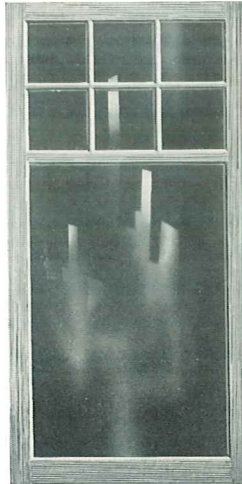

No. 886

No. 887—Wood Bars.  
No. 888—Metal Bars.No. 889—Wood Bars.  
No. 890—Metal Bars.No. 891—Wood Bars.  
No. 892—Metal Bars.No. 893—Wood Bars.  
No. 894—Metal Bars.

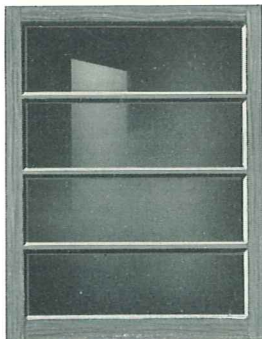

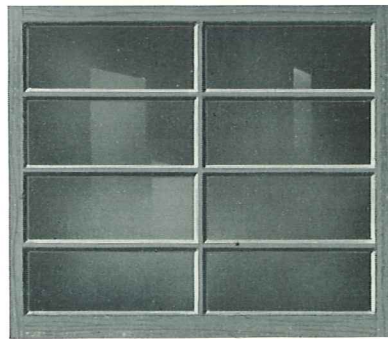

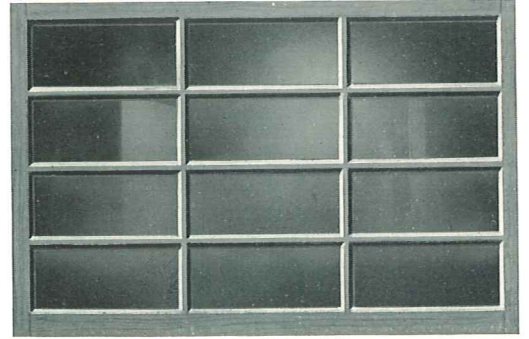

## MARGINAL LIGHT WINDOWS

Divided lights in top of wood or metal bars.

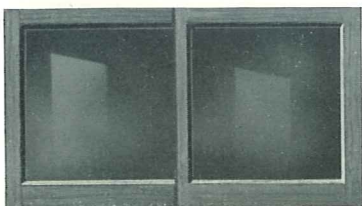

## CASEMENT SASH

No. 895—Wood Bars.  
No. 896—Metal Bars.No. 897—Wood Bars.

For pairs of Cupboard Sash, rabbeted, double the list for a single Sash and add \$0.60 list per pair.

For Cupboard Sash lipped 3 or 4 edges, add per Sash, \$0.60 list.

For smaller or intermediate sizes take list of next larger listed size.

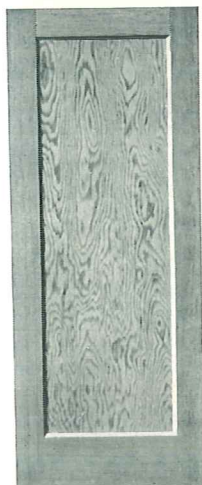

When ordering Windows and Sash always specify width first and height last.

*Always Specify Items by Design Numbers*

# ONE PANEL CUPBOARD DOORS

$\frac{3}{4}$ " THICK

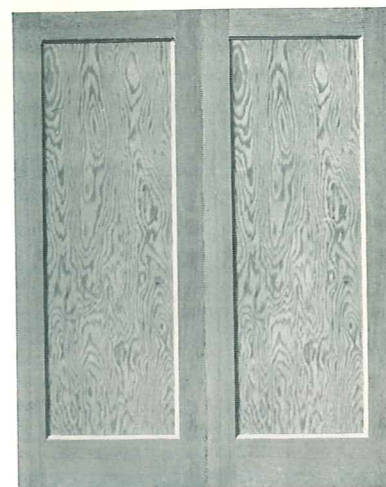

No. 937

If a single door is required to fill an opening 18x36, order should specify; 1 Cupboard Door, 18x36.

When doors in pairs are required to fill an opening 36x36, order should specify; 1 Pair Cupboard Doors, 36x36.

Unless otherwise specified, doors in pairs will be center rabbeted.

For pairs as described and illustrated, double the price of single door and add \$0.60 to list price.

In Pairs

# FLUSH CUPBOARD DOORS

$\frac{3}{4}$ " Thick—Fir

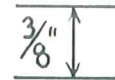

## IMPORTANT

When ordering lipped doors specify opening size and producer will allow for lipping. Specify whether doors are to be lipped on all four edges or only top and two sides. Doors ordered lipped will be made like illustration unless purchaser submits different detail or sample of hinge.

When ordering doors in pairs, rabbeted, specify opening size and producer will allow for rabbet. EXAM-  
PLE: For opening 36x36 specify 1 pair 36x36. Unless otherwise specified, doors in pairs will be center rabbeted.

Lipped Front for  $1\frac{1}{8}$ " One Panel Door

Lipped Front for  $\frac{3}{4}$ " One Panel or Flush Cupboard Door, or for Cupboard Sash

In compiling this Catalogue  
effort has been made  
to interpret present day  
**ARCHITECTURAL TRENDS**  
and include  
a wide assortment  
of  
**DESIGNS AND SIZES**  
Sufficient to enable Builders  
to specify  
**STOCK MILLWORK**

## **STOCK FRAME SECTION**

---

The following pages contain

complete

**DETAILS, SPECIFICATIONS AND LISTS**

FOR

**STANDARD FRAME CONSTRUCTION**

Builders will find it economical

to have plans provide for use

of

**STOCK MATERIALS**

---

Details herein are for standard wall construction

with

3 $\frac{5}{8}$ " Studding, 3 $\frac{3}{4}$ " Sheathing and 3 $\frac{3}{4}$ " Lath and Plaster.

Any deviation must be fully explained and emphasized

so that Frames will fit exact requirements.
